

Action M

Change in Volleyball Officials Associations

Issue- A school in the Section would like to change volleyball official associations to improve the quality, increase the number of officials they see, and not have to move game times because of lack of officials.

Background Information-

Since we pool mileage for basketball, football, and volleyball schools must ask permission from the Board of Managers to change associations. This school is claiming that the Chico Association is just as close as their current association.

The school requested an email vote of the Board of Managers to change associations.

Discussion-

The quality of officials is subjective: is this a reason to change associations?

Did we set a precedent when we allowed Yreka to change associations?

Do we want to do away with the pooling of mileage?

Recommendation- I'm interested in hearing the discussion. Allow this issue to go to the Board of Managers for a vote.

Action N

Request for a school to change soccer seasons

Issue- A school would like to change from the winter season to the fall soccer season now for this year.

Background Information-

At the last realignment cycle all schools were place in leagues.

By this school changing it will only leave three schools in the league.

Discussion-

Do schools have the right to change season whenever they wish?

Is this a realignment issue and needs to be addressed at the next cycle?

Recommendation-

This is a realignment issue and should be addressed in the realignment process.
